

Severe May Weather Sweeps through Kansas

Severe May Weather Sweeps through Kansas

The month of May brought numerous severe storms throughout the state of Kansas. On Friday, May 4, an F-5 tornado - the most powerful tornado to hit the U.S. in the last eight years - devastated the community of Greensburg. More storms continued across the state throughout the month with tornadoes, rain, hail and flooding. The storms claimed 13 lives, caused numerous injuries and have made hundreds homeless.
